OBJECTIVE

A driven Front-end Developer seeking to leverage expertise in modern web technologies to build scalable and user-centric applications.

PROFESSIONAL SUMMARY

- Over 5 years of professional experience as a Web Developer..
- Strong experience in ReactJS, VueJS, TypeScript, RESTful APIs, and Tailwind CSS.
- Familiar with back-end tools including NodeJS, Laravel PHP, MySQL, and MongoDB.
- Project domains are E-commerce, Cloud management, CRM, AI Assistant.
- I have experience providing solutions to client requests, projecting timeline and managing budget, fixing issues in the app for users, and helping manage team work, reviews, and rewards.
- Experienced in leading front-end teams of 3–5 members, conducting technical interviews, and providing front-end advisory during the presales process.

CERTIFICATIONS & AWARDS

CMC Global - *Web Developer*

JUNE 2022 - PRESENT

- [PSM I certificate](#)
- [Rising Star in Q1 2024](#)

Seal Commerce - *Front-end Developer*

MAY 2021 - MAY 2022

- **Monthly Team Spotlight** in March 2022, September 2021.

FPT University

SEPTEMBER 2017 - JUNE 2021

- **Major:** Software Engineering
- [Project Management Principles and Practices](#) Coursera certificate.
- [Google Data Analytics](#) Coursera certificate.
- GPA: 7.7 / 10.
- Received a **scholarship of 70% of tuition fee** in the entrance exam of FPT University.

TECHNOLOGY AND SOFTWARE DEVELOPER SKILLS

Aware, Knowledgeable, Proficient

Competencies	Level
Programming Languages	
Javascript, Typescript	Proficient
Front-end Web Technologies	
VueJS	Proficient
ReactJS	Proficient
WebSocket	Knowledgeable
jQuery	Knowledgeable
Back-end Web Technologies	
RESTful API	Knowledgeable
NodeJS	Knowledgeable
MySQL	Knowledgeable
Programming Technique & Tools	
Design patterns	Knowledgeable
Source control: Github, Gitlab	Knowledgeable
Task Management: Jira, Clickup, Trello	Knowledgeable

EXPERIENCE

CMC Global - *Web Developer*

JUNE 2022 - PRESENT

Responsibilities:

- Developed and maintained multiple large-scale web applications for international clients using **VueJS** and **ReactJS**.
- Actively involved in both **project implementation** and **presale consulting** — from analyzing client ideas to creating high-level designs and task breakdown (WBS).
- Collaborated daily with cross-functional teams including **PM, BA, and UI/UX** to define product roadmaps and deliver high-quality features.
- Led front-end efforts in complex environments, conducted planning meetings, and ensured product alignment with customer needs.

Achievements and skills gained:

- Built AI-integrated platforms (e.g., Bspin) with advanced technologies such as WebSocket, LLM AI, AWS EC2, and Copilot-based assistants.
- Successfully contributed to presale phases by transforming client ideas into clear technical plans, helping projects secure funding and approval.
- Adapted quickly to enterprise-level systems (Samsung, Panasonic) and delivered features using test-driven development (TDD) and structured design documents.
- Strengthened skills in cloud architecture, system design thinking, and stakeholder communication, while leading or co-leading multiple feature teams.

Seal Commerce - *Front-end Developer*

MAY 2021 - MAY 2022

Responsibilities:

- Implementing web design and development principles to build stable software.
- Collaborating closely with the team to support projects during all phases of delivery.
- Using Vue, Bootstrap 4, jQuery to develop UI.

Achievements and skills gained:

- Communicating technical issues in an understandable manner to the team and clients.
- Identifying innovative ideas and proof of concepts according to project requirements.

IMPL Vietnam - *Web Developer*

DECEMBER 2019 - SEPTEMBER 2020

Responsibilities:

- Maintain and develop open-source web projects for Japanese customers.
- The main programming languages are Javascript, PHP.

Achievements and skills gained:

- Developing open-source software.
- Exposed to the way Japanese customers work.
- Deep study of the theory of HTML, CSS, JavaScript.

PROJECT

Bespin - *Front-end Developer*

DECEMBER 2024 - PRESENT

A cloud-native chatbot platform that helps DevOps and cloud engineers manage servers and AWS services via LLM AI model to transform natural language into right commands and actions .

Responsibilities:

- Participated in presale: analyzed client's idea, created high-level design, estimated tasks, built WBS.
- Developed real-time Web Terminal for remote EC2 control using AWS SSM and WebSocket.
- Integrated multiple AI models (ChatGPT, Claude, etc.) and supported agent-based AWS orchestration.
- Supported file editing with AI Copilot inside terminal for live operations.
- Helped secure investment rounds through demos showcasing advanced front-end features.

Achievements and skills gained:

- Worked with advanced technologies like WebSocket, LLM AI, and AWS EC2.
- Took part in the presale phase by analyzing client ideas and building high-level designs.
- Led the front-end team in a fast-changing startup environment.
- Helped improve product quality and secure investment through technical demos.

Cloud in One - *Front-end Developer*

NOVEMBER 2023 - DECEMBER 2024

This project involves developing a cloud management application that integrates multiple providers into a single management system. This comprehensive solution allows users to manage various cloud services seamlessly from one platform. It offers

features such as unified monitoring, resource allocation and performance tracking, ensuring efficient and streamlined cloud operations

Responsibilities:

- Develop functions and fix bugs
- Maintain functions
- Working with the Product Manager, BA and the Design team to define the product roadmap
- Daily meeting with my team
- Regularly update the progress and status of the task
- Report the work at the end of the day

Achievements and skills gained:

- Quickly adapted to a large-scale system developed over four years.
- Applied test-driven development to ensure code reliability.

Data Center Management - *Front-end Developer*

JUNE 2023 - NOVEMBER 2023

An internal system of Samsung for managing and analyzing their servers and cloud services.

Responsibilities:

- Handling and editing the UI/UX of the application.
- Developing new features
- Fix bugs

Panasonic Vendor Management - *Front-end Developer*

JANUARY 2023 - MAY 2023

An internal web application of Panasonic Vietnam company. It manages and stores information about vendors.

Responsibilities:

- Participated in presale: analyzed client's idea, created high-level design, estimated tasks, built WBS.
- Create Detail Design document
- Implementing features
- Build testing and support go live
- Support technical for team

Achievements and skills gained:

- Participated in the presale phase with clear WBS and detailed designs.
- Supported AWS S3 integration in vendor data systems.

Project Requirement Management System - *Front-end Developer*

AUGUST 2022 - DECEMBER 2022

A web application of Samsung company for managing Product requirement, Test case.

Responsibilities:

- Handling and editing the UI/UX of the application.
- Developing new features
- Fix bugs

Gempages Web Builder - *Front-end Developer*

MAY 2021 - MAY 2022

This is a web builder application for Shopify – E-commerce platform with customers mainly in Europe.

Responsibilities:

- Handling and editing the UI/UX of the application.
- Developing new features
- Cooperate with customer service to support users.
- Fix bugs
- Build testing and support go live

Achievements and skills gained:

- Helped users in Europe use the product effectively through live support.
- Gained a strong product ownership mindset working in a product company.

Motelo - *Web Developer*

NOVEMBER 2020 - APRIL 2021

Platform for finding and renting houses for college students. This is a web application for supporting the house owner to the public and posting their rooms for rent and students want to find room suits for their needs based on the surrounding data.

Responsibilities:

- User research
- Design project architecture
- Developing new features
- Fix bugs
- Build testing and support go live

Achievements and skills gained:

- Initiated product ideas through market research and user needs.
- Designed the full project architecture and handled all documentation.
- Developed and tested features for a student housing platform.

-
- Delivered a working MVP from concept to release.

SoundID - *Web Developer*

MARCH 2020 - MAY 2020

SoundID is a bar reservation project in Japan. Its technologies are Framework CakePHP, Bootstrap4, jQuery and Database MySQL.

Responsibilities:

- Development
- Optimize code
- Bug Fixing

MoneyLab - *Backend Developer*

FEBRUARY 2020 - MARCH 2020

MoneyLab is a project that manages real estate records with Framework Laravel and Database MySQL

Responsibilities:

- Development
- Optimize code
- Bug Fixing
